

# EQUIPMENT FINANCING WITH VSS

Our equipment financing programs enable your company to acquire the equipment you need without using precious working capital or credit lines.

## ADVANTAGES OF FINANCING

- **100% Financing:** Financing business equipment often covers 100% of the equipment cost with room to bundle soft costs including training, software and installation. 100% financing conserves working capital.
- **Tax Savings:** Tax advantages often make financing less expensive than an outright purchase.
- **Cash Flow:** Customize a solution to fit your particular situation and pay for the equipment as you use it.
- **Use Inflation to Your Advantage:** If you pay cash for equipment, you pay with today's dollars at today's value. When financing, you pay with next year's inflated dollars, and the next, and the next.
- **Preserve Bank Credit Lines:** Leasing doesn't affect your bank borrowing limits. You still have 100% of your credit available.
- **Accounting Benefits:** Monthly payments may be deductible as operating expenses rather than accounting for the equipment as an asset.

UNLOCK YOUR  
BUSINESS POTENTIAL  
WITH FLEXIBLE  
FINANCING SOLUTIONS  
TAILORED TO YOUR  
EQUIPMENT NEEDS!
